Re: Duke Memorial United Methodist Church

Dear Ben:

We would like to propose to spend one week working at the above mentioned project. During this time we would do the following work. We would start by cutting out limestone to limestone joints where necessary and sealing them. We would also do a limited amount of tuck pointing as needed to stop water migration into the building. We would caulk the joint between the sidewalk and the building and steps at the front entrance. We will also evaluate the remainder of the elevations around the building if time permits.

Our cost for one weeks labor to do the work as described above will be \$2,604.00. Equipment rental and material costs, which will be invoiced from the Seager Waterproofing warehouse in Greensboro, will both carry a 20% markup.

Please be in touch with our Raleigh Office, if you have any questions, or to inform us of how you would like for us to proceed.

Yours very truly,

Steven D. Wright
