Dear Peggy,

Thank you so much for remembering to send me the computer materials we talked about. I will look this over with much interest.

I truly enjoyed your visit. Forgive me, but I am always surprised when distinguished people show that they are human and personable and have the time for people like myself. It is a genuine pleasure to feel I know you. I also never got a chance to say how much I enjoyed your talk to us. Your delivery as well as your information was inspiring, and I must say I was trying to imagine myself in front of Davidson students fascinating them with as much knowledge and enthusiasm for my subject.

Perhaps one day, if you were to be in the area, you could come to Davidson and talk to the students about "non-feudalism". I hope you have a very pleasant summer in France. Thank you again for the materials. I hope I may keep in touch.

Sincerely,

Susan Keefe
